Interior of College Chapel.

Assumption College

Sandwich, Ontario.

The building, which up to 1875 had been large enough to supply the needs of the Catholics of Western Ontario for higher education, was erected at Sandwich by the Jesuit Fathers. Here in 1855, those world-famed educators of Catholic youth erected the original building of the regular college group, and opened classes in order to give a religious and classical training to the young men of the district and surrounding country. Before two full years had elapsed, however, these zealous instructors had been called away to other more pressing work. The college, during the next decade, passed successively through the hands of the Benedictines, of the Basilians, and to the late Theodule Girardot, who afterwards filled the position of the Inspector of Public Schools in the County of Essex. In 1870, the late Dr. Walsh, then Bishop of London, seeing the need of establishing the College on a more permanent basis, called upon the Priests of St. Basil to take charge once more of Assumption College. The prospects of success, he felt, were now brighter; the Catholics of the neighborhood were prosperous; and this, together with the proximity of the fast growing metropolis of the great State of Michigan, just across the border, promised a large field of usefulness to the College.

Father Dennis O'Connor, later Bishop of London and Archbishop of Toronto, and now living in retirement at the Noviciate of the Basilian Fathers in the latter city, headed the little band that came to take charge of Assumption College in September of 1870. That the choice of Superior was a wise one is evidenced by the splendid success with which the College

was conducted under the new regime. Himself a trained scholar, a born teacher, and typical disciplinarian, Father O'Connor possessed the happy faculty of infusing part of his own energy and resistless perseverance into the hearts of the small staff of professors that shared his labors ; and thus the College grew and prospered. Owing to the ever increasing attendance of students from both Ontario and the adjacent States, it was found necessary in 1875 to add to the College buildings, and still again in 1883 ; so that now there is ample accommodation in the Institution for some two hundred boarders. The year 1908 witnessed the completion of a Beautiful Alumni Chapel, which was dedicated with impressive ceremony by the Rt. Rev. J. Edward Meunier, Administrator of the diocese of London, on June 16th.

In 1890, Dr. O'Connor was called to the See of London to succeed the Right Rev. Bishop Walsh, who had been raised to the Archiepiscopal See of Toronto. The impetus for good given the College by its first President after the Basilians had assumed permanent charge still continues to keep it abreast of the times, and true to its principles of training youth in "Virtue and Discipline and Knowledge."

The situation of the College on the south bank of the Detroit river, the salubrious climate of extreme Western Ontario, the excellent system of instruction in both the Classical and Commercial Courses, make Assumption College a most desirable residential school for young men and boys.

General Conspectus of Studies.

The College, in carrying out its idea of Education, aims at forming the whole man—the moral, the intellectual, and the physical. It teaches science and discipline, trains the higher faculties of the soul, and makes right living the great end to be obtained.

Religion and science go hand in hand throughout the course, and these, aided by a discipline, mild yet firm, furnish the only certain way to turn out men of a Christian character, of learning and of self-control. This is our hope, that the students who pass through our hands will make good priests in the Church, or worthy laymen, able to hold their own in whatever walk of life their lot may be cast.

THE PREPARATORY SCHOOL.

The Preparatory School is designed for young boys, to prepare them for entrance into the High School or the Commercial Course. To enter the Preparatory School boys must have attained Junior Third Reader standing in the Canadian system or have reached Fifth Grade in the school system of the United States. When the work of Senior Fourth or 8th Grade has been completed students are admitted to the High School or Commercial Course, according as they intend to study for one of the liberal professions or fit themselves for business.

THE COMMERCIAL COURSE.

The Commercial Course prepares the student for a business career. The course in the college can be completed in one year. For some students, however, an additional year is necessary to secure a diploma. The object of the course is to make the student familiar with the theory and practice of business transactions, to give him a clear insight into commercial relations and to form his judgment. The subjects taught in the Commercial Department are the same as are found in the curricula of the best business colleges, to which is added a

thorough course in Christian Doctrine. Business and Short-hand and Typewriting diplomas are awarded to students who pass with honor the examinations set at the end of the course.

THE HIGH SCHOOL COURSE.

The High School Course embraces four years' work, though a clever student can by faithful application cover the prescribed matter in three years. The subjects taught are : Christian Doctrine, Latin, Greek, French, German, English, History, Geography, Mathematics and Science. The course is designed to qualify the student for admission to the College Course and for matriculation into any Canadian or American Undergraduate University.

THE COLLEGE COURSE.

For admission to the College Course students must have completed the College High School Course or have passed Junior Matriculation or Entrance to Normal examination if they come from Canadian High Schools or Collegiate Institutes, or have graduated from a High School having a four year course if they come from an American school.

The College or Arts' Course embraces four years ; designated Belles Lettres, Rhetoric Junior and Senior. The subjects of the course are Christian Doctrine, Church History, Scripture, Latin, Greek, French, German, English, History, Advanced Mathematics and Science, and Philosophy.

RELIGIOUS INSTRUCTION.

A Catholic College, as such, can have no other reason for its existence than the necessity which is felt to exist of teaching religion. Education without religion is a misnomer, which may produce learned infidels, but leaves the individual without any object in life beyond the desire of acquiring the mere material goods bestowed by the world on its votaries. Hence, as religion is the reason of our existence, religious instruction is given in all the years. From the elementary truths taught in Preparatory School, the student is led through a well graded course of Christian Doctrine, Church History and Scripture, during which he not only learns to give a reason for the faith that is in him, but breathes an atmosphere of Catholicity, that

gives tone to his whole after life, and makes him a true son of the Church, whether he serves her in the world or in the sanctuary.

PHILOSOPHY.

The Classical Course finds its natural complement and perfection in the study of Philosophy, the foundation of all science and the handmaid of Theology. The Philosophy taught in the college is the Philosophy of St. Thomas, which combines the best of ancient thought with the teachings of the great exponents of Catholic doctrine, and which is warmly recommended by our late Holy Father, Pope Leo XIII., in his Encyclical Letter "*Æterni Patris*," of the fourth of August, eighteen hundred and seventy-nine. The Course embraces Logic, Mental Philosophy, Ethics and History of Philosophy. In addition to these subjects, students in Philosophy are required to pursue their studies in Latin, English, French or German, Scripture Church History and Christian Doctrine. In all these subjects they have access to numerous books of reference. They are members of a Literary Association and of a Dramatic Club, in which they have excellent opportunities of improving themselves in English Literature and Elocution. They are provided with rooms and have the advantage of a special rule. The grade is that of the third and the fourth years in the Arts Course.

CLASSICS.

For many hundred years the Classics have been reputed the best instrument of mental training. The study of them is fitly called a LIBERAL education, because it emancipates the mind and is the apprenticeship everyone must serve before becoming a "free brother of the guild which passes the torch of life from age to age." Notwithstanding the views latterly advanced as to their utility, we still believe that no discipline is more useful where the aim is to impart broad culture with accuracy in scholarship. The master minds in Church and State, trained in this gymnasium, are guarantee sufficient that we do right in giving much time to the study of the Classics, and in teaching them in such a way that the student can not only translate but read them, that is to say, take it into his own mind the thoughts and ideas of the author, without a conscious appeal to the vernacular equivalent.

ENGLISH.

While the value of Classics as an educator is recognized in the High School and College Courses, the importance of English is not overlooked. English is the language of United States and of the greater portion of Canada. Students must be trained to speak and write it well. A glance at the curriculum will show that the faculty recognizes the necessity of the most careful training in English. In the High School Department the course is that prescribed by the Department of Education of Ontario for Collegiate Institutes and High Schools. The course in the Collegiate Department corresponds with that prescribed for students in our Universities.

HISTORY.

The poet says that "the noblest study of mankind is man." If we except man's Creator, the poet speaks true. History furnishes a knowledge of men, of the great men of the world and of their deeds; and hence History claims a place in every school curriculum. The college graduate should have an intimate knowledge of the history of his country and a good acquaintance with ancient and modern history in general, and every Catholic college graduate should have a thorough knowledge of the history of the grand old Church to which he belongs. Such knowledge the course in history, profane and ecclesiastical aims to give.

FRENCH AND GERMAN.

The knowledge of some modern language other than one's own is becoming more and more necessary every day, especially in a country which represents many nationalities. It is valuable to the business man, invaluable to the scholar and necessary to the priest. The scholar cannot ignore the literatures of languages closely related to his; and the priest, who, by the nature of his calling, comes into contact with people of different tongues, to whom he must dispense the bread of doctrine and

the consolations of Holy Church, is frequently made to realize his limitations, if English is his only tongue. Realizing this fact and knowing that many of our students come from localities in which the knowledge of French or German is necessary, the study of these languages is made part of the course in the High School and College Departments. The study of French is begun in the first year of the High School Course ; German in the second year. Every student must take one or the other language through the High School and the first two years of the College Course. These languages, of course, are taught without extra charge and the facilities afforded to students to master them are unsurpassed.

MATHEMATICS.

The study of Mathematics is in itself an education. It is one of the most powerful factors in forming the judgment, and helps to develop the reasoning powers, probably, to a greater extent than does any other study. Hence it has an importance, in any scheme of education, that cannot be neglected, and can hardly be over estimated. Knowing this, we have made our Courses in Arithmetic, Algebra, Geometry and Trigonometry very complete.

PHYSICS AND CHEMISTRY.

The course in Science is strong. The world to-day demands of every secondary school a good training for students in Physics and Chemistry. The College is equipped to give such training. The new laboratories are amply furnished ; and fifty students may work out experiments at the same time under the supervision of the professor. These two branches are pursued, together with Botany and Biology, for three years in the High School. Physics is continued for two years in the college course. Chemistry is optional in the higher course.

MUSIC.

Individual lessons are given in pianoforte, singing, violin, mandolin, and other stringed instruments. Opportunities are

ered for the practice of ensemble playing. Once a week a class is held for the special study of Liturgical Chant. Occasionally entertainments are prepared, in which pupils that are sufficiently advanced are requested to take part. A Glee Club is maintained in the College for the special practice of part singing, and all the pupils gifted with sufficient voice and musical temperament may become members of it.

STUDENT SOCIETIES.

Various societies and associations have been organized for the promotion of religion, sociability, and literary activity. The Sodalties have a chapel, in which a devotional meeting is held once a week, consisting of a short instruction, chanting office, singing of hymns, and Holy Mass. The literary societies hold bi-weekly reunions for the reading of essays, debates, etc. A well-equipped reading room is opened to the students every evening and on the afternoons of holidays. A favorite resort for all the students, during the winter evenings, is a well furnished club room, in which they while away many an otherwise dull hour in pleasant social intercourse and games.

II

Discipline.

Any system of education which trains the intellect without developing the moral side of character, falls short of its purpose ; for education must make the student not only a scholar, but especially a man of rule and good manners. Hence it is that order and regularity, promoted by a firm and wise discipline, are indispensable in a college. They are indispensable in the study-hall, in the class-room, and in the playground ; in the study-hall, where solid work is not possible without quiet and silence ; in the class-room, where the success of both teachers and pupils depends in a large measure upon the discipline that reigns there ; and in the playground, where the boys are expected to be upright and gentlemanly in behavior. Therefore the following regulations are enforced at the College ;

No student may leave the College grounds without permission. Permission to visit the city on business may be obtained. It is conditional, however, on good work and good conduct.

Absence from the College during the term will not be allowed except in case of serious illness of the student or a member of his family at home or for some equally grave reason.

Permission to remain away from the College over night during the term will not be granted.

Wednesday, Saturday and Sunday afternoons, between 2 and 5 o'clock, are visiting days. Parents and other visitors are requested to bear this in mind.

Students, returning late in September or failing to report promptly after the Christmas recess, shall forfeit their right to compete for special prizes and honors.

The Students are strictly forbidden to lend or borrow money or to sell or exchange personal effects of any kind.

Any damage done by a student to the furniture, instruments or books of the college, will be charged to his account.

Students are expected to report any school property they injure or destroy.

The correspondence of the students is subject to the supervision of the President or Secretary.

Day scholars are not allowed to take out letters or to perform errands of any kind for the boarders.

The use of tobaccos is strictly forbidden.

The sending of boxes of eatables from home to the students is not approved by the faculty.

Obstinate disobedience, incorrigible sloth, the use of intoxicating liquors, introducing into the house or reading books of an irreligious or immoral character, leaving the college grounds without permission after six o'clock p. m., are faults too grievous to be punished and for which the students shall be expelled from the college.

ADMISSION.

Boys below Junior Third standing in Canadian schools, and Fifth Grade in American schools are not eligible.

Every candidate for admission shall present a certificate of good moral character from his pastor if he is a Catholic, and from some person of standing if he is not a Catholic. If he comes from another institution he must bring a letter of honorable dismissal.

Students may enter at any time during the school year before Easter.

As far as possible students should be present on the afternoon of the day when school opens in September, and of the day on which work is resumed after the Christmas recess.

Every new student must deposit on entrance a registration fee of ten dollars. This sum will be applied to his tuition of the ensuing term. It is not returned if the student withdraws.

EXAMINATIONS AND REPORTS.

There are two written examinations in the year; the FIRST immediately before the Christmas holidays, and the FINAL before the close of the academic year.

The classes of new students are determined by examination at the time of entrance.

Students are promoted in course at the beginning of each scholastic year in September, if they have attained the required standard in the class-work, and the examinations of the preceding year.

At the examinations the standard is as follows: (1) for PASS forty per centum of the marks assigned to each paper and sixty per cent. of the total marks for all the papers; (2) for SECOND-CLASS HONORS, seventy per cent. of the total marks for all papers; and (3) for FIRST-CLASS HONORS, eighty per cent. of the total marks for all the papers.

Students who fail in any subject at the examinations are required to pass a supplemental examination in that subject before being admitted to the work of the ensuing term.

Failure in any three subjects at the Final examination involves the loss of the year.

Official bi-monthly reports of each student's progress and deportment and class standing will be sent to the parents or guardians. These reports also give information of the marks obtained at the examinations.

Physical Culture.

The Basilians have ever recognized the necessity of training the whole man ; so while they have provided for the moral and the intellectual well-being of their pupils, as may be seen from the curriculum of studies, they have not been unmindful of the physical culture of the boys. Although games and amusements are never allowed to encroach upon the more serious work of college life, yet a large campus and shaded walks afford ample opportunity for outdoor sports ; and spacious handball courts, etc., provide for indoor recreation in inclement weather.

The supervision of all athletic matters has been entrusted to an Athletic Board, consisting of three members, elected by the students and one appointed by the faculty.

To assist in meeting the expenses of "the Yard," an annual fee of two dollars and a half is imposed on each student.

Carlyle—The Hero as a Man of Letters
George Elliot—The Mill on the Floss.

Ruskin—Crown of Wild Olives.

Tennyson—Northern Farmer, Locksley Hall.
In Memoriam.

Browning—Cavalier Tunes, My Last Duchess.
Fra Lippo Lippi, Epilogue to Asolando.

M. Arnold—Sohrab and Rustum.

Selections from Hazlett, Lamb, DeQuincy, Macaulay,
Ruskin, Arnold, Stevenson. (Bronson's English Essays.)

RHETORIC—The Study of Rhetoric in connection with the reading
of the prescribed authors. Text—Scott and Denney.

FRENCH—Grammar, Translation from English into French, Sight
translation of Modern French Prose. Texts—Elements
of French Composition, J. Horn Cameron, Leçons de
Choses par Saffray (Hachette.)

GERMAN—Grammar, Translation from English into German.
Sight Translation of easy German prose.
Thomas and Hervey's German Readers.

HISTORY—General History of Greece to 146 B. C.
General History of Rome to 476 A. D.
Texts—Botsford's History of Greece and Rome.

MATHEMATICS—Algebra, Simple and quadratic equations, variation,
proportion, progressions, interest forms and an-
nuities.
Analytical Geometry—A course in Elementary,
Analytical Geometry of two dimensions.

TRIGONOMETRY—The measurement of Lines and Angles; Ratio
of the circumference of a Circle to the Diameter;
how to convert the Measures of Angles from one to
another System of Measurement; Contrariety of Di-
rection; Trigonometrical Ratios; the Changes in
Sign and Magnitude of the Trig. Ratios of an
Angle; Ratios of Angles in the First Quadrant;
Relations between the Trig. Ratios for the same
Angle; Comparison of Trig. Ratios for different
Angles; Solutions of the Trig. Equations; the Trig.
Ratios of two Angles; The Trig. Ratios for Multiple
and Sub-Multiple Angles.

PHYSICS—MECHANICS.

- (a) Motion and Force; Uniform and Accelerated Motion; Forces
of Gravity; Relations of Time, Space and Velocity; Work,
Energy.

- (b) Composition and Resolution of Forces ; Principle of Moments ; Equilibrium ; the Centre of Gravity.
- (c) Machines : The Lever ; the inclined Plane ; Pulleys ; the Wheel and the Axle ; the Pendulum ; Central Force.

HYDROSTATICS.

- (a) Principle of Transmission of Pressure in Liquids ; the Hydraulic Press ; Centre of Pressure.
- (b) Specific Gravity ; Methods of finding the Specific Gravity of Solids and Liquids.
- (c) Capillary Action ; Hydraulic Pumps ; Water Waves.

PNEUMATICS.

- (a) Characteristics of Gases ; Pressure of Gases ; Toricelli's Tube ; Mariotte's Law ; Barometer.
- (b) The Air Pump ; Atmospheric Pressure ; the Siphon ; Forcing and Suction Pumps ; Manometers.

ACOUSTICS.

- (a) Nature of Sound ; Velocity of Sound in different Media ; Sound Waves ; Refraction ; Reflection and Inflection of Sound.
- (b) Musical Sounds ; the Sonometer ; Vibration of Air in Pipes ; Vibration of Rods and Plates ; the Voice.
- (c) Musical Scales ; Numerical Relation of Notes and Intervals ; the Chromatic Scale ; Harmonics ; Musical Instruments.

CHEMISTRY.

- (a) Difference between Physical and Chemical Phenomena ; Elements ; Atomic Weights ; Laws of Definite Proportions ; Ancient Chemical Theories ; Theory of Quantivalence.
- (b) Acids, Bases, Salts. Chemical Nomenclature.
- (c) Hydrogen, Oxygen, Phosphorus, Sulphur and their principal compounds.
- (d) Laboratory work under the direction of the Professor.

SECOND YEAR ARTS—(Rhetoric.)

RELIGIOUS KNOWLEDGE—Christian Dogma : God considered in Himself ; God the Creator of the World ; God the Redeemer of Mankind.

CHURCH HISTORY—From the Downfall of the Western Empire, 476 A. D. to the end of the 13th century. The conversion of the Barbarians. The church and civilization, the Crusades.

SCRIPTURE—The Gospel of St. John ; the Acts of the Apostles.

LATIN—Livy, Book IX.

Cicero—Pro Marcello, Pro Mureno,

Horace—Odes I and II.

Catullus—Selections.

Composition based on prose authors. Text D'Ooge.

Latin Grammar, (Bennett.)

History of Roman Literature.

GREEK—Homer—Odyssey XXIII and XXIV.

Plato—Apology and Crito.

Composition—Pearson's Greek Prose.

Grammar—Babbitt.

History of Greek Literature.

ENGLISH—Besides their weekly compositions, students are required to prepare four essays during the year.

Literature Texts—Shakespeare, Romeo and Juliet, Much Ado about Nothing, Hamlet, Henry IV.

Special study of the structure of the short story and the novel.

Rhetoric—Text, O'Connor.

Literature—Selections from Corneille, Racine, Brunet, Moliere, Boileau, Sainte-Beuve.

GERMAN—Grammar : Translation of English into German. Sight translation.

Literature—Selections from German prose and poetry.

HISTORY—The chief movements in European and American history since the discovery of America.

TRIGONOMETRY—Logarithms ; Trig. and Log. Tables ; Relations between sides of a Triangle and Trig. Ratios of the Angles of the Triangles ; Heights and Distances Measured : Areas of Triangles, Polygons and Circles

PHYSICS—OPTICS.

(a) Velocity of Light ; Photometry ; Reflection of Light ; Plane, Convex and Concave Mirrors ; Real and Vertical images.

- (b) Refraction of Light in different Media. Determination of the Index of Refraction, Lenses. Principal Focus; Conjugate Foci.
- (c) Decomposition of Light: The Spectrum. Complementary Colors. The Spectroscope. The Rainbow. Polarisation of Light.
- (d) Vision. The Eye. Eye-pieces. The Microscope. The Telescope.

HEAT.

- (a) Nature of Heat. Expansions of Solids, Liquids and Gases. Co-efficient of Expansion. The Thermometer. Conduction and Radiation of Heat.
- (b) Specific Heat. Methods of finding Specific Heat. Latent Heat.
- (c) Tension of Vapors. Dalton's Laws. The Steam Engine. Mechanical Equivalent of Heat.

MAGNETISM.

- (a) Natural and Artificial Magnets. Magnetic Poles. Magnetic Fields and Lines of Force.
- (b) Magnetism of the Earth. The Magnetic Needle. The Dip of the Needle. The Mariner's Compass.

ELECTRICITY.

- (a) Static Electricity. Conductors and Insulators. Potential, Electrostatic Induction. The Electroscope. The Leyden Jar. Electrical Machines.
- (b) Current Electricity. Cells. Units of Current, Quality and Resistance. Ohm's Law. Wheatstone's Bridge. Effects of Current on a Magnet. Ampere's Theory of Magnetism. Galvanometers. Telegraph.
- (c) Electro-Magnetic Induction. Lenz's Law. Induction Coils. The Telephone. Dynamos and Electric Motors.
- (d) Electro-Chemistry. Electrolysis. Electroplating. Relations between Electricity and Heat.

CHEMISTRY.

- (a) Non-Metals continued: Carbon and the principal Carbon compounds.
- (b) Metals: Potassium, Sodium, Calcium, Iron, Zinc, Copper, Mercury, Silver, Gold.
- (c) Electrolysis and Elements of Analysis.
- (d) Laboratory work under the direction of the Professor.

THIRD YEAR—(JUNIOR.)

RELIGIOUS KNOWLEDGE.

Christian Dogma : The plan of salvation, grace, the Sacraments, the Sacrifice of the New Law, the Last Things.

CHURCH HISTORY—From the beginning of the 14th century to the Treaty of Westphalia, 1648. The Temporal Supremacy of the Popes ; Reaction against the temporal Supremacy. Protestantism in various countries of Europe. The True Reformation.

SCRIPTURE—The Epistles of St. Paul in part.

PHILOSOPHY—

LOGIC :—(a) Ideas and Their Different Kinds ; The Predicables ; Propositions ; Conversion and Opposition of Propositions.
(b) The Syllogism and its Rules. Fallacies and their Solution.
(c) Methods of Induction and Deduction ; Methods of Study ; Scholastic Method of Argumentation.

PSYCHOLOGY I—(a) General Survey of the Faculties of the Soul.

(b) THE SENTIENT FACULTIES—The External Senses. Their Physiology and Education. Sensation and Perception. Sensile Species. The Common Sense. Memory. Imagination.

(c) THE INTELLECTUAL FACULTIES—Object and Mode of Operation of the Intellect. Intelligible Species. Difference between Intellect and sense.

(d) THE APPETITIVE FACULTIES—Concupiscible and Irascible Appetites—their Influence on the Will. Nature, object and Freedom of the Will.

II—THEORIES OF KNOWLEDGE :

- (a) Scholastic System of the Origin of Ideas. Aristotle. St. Thomas.
- (b) Sensism. Locke. Condillac.

- (c) System of Innate Ideas. Plato, Descartes, Leibnitz, Kant.
- (d) Ontologism, Malebranche, Gioberti.
- (e) Relation of Speech to Thought.

III—CRITERIA OF TRUTH :

- (a) Criteria in General. Certitude and its Different Kinds.
- (b) Criterion of Consciousness.
- (c) Criterion of the External Senses. Theory of Immediate Perception. Idealism and its Different Forms, Berkeley, Kant, Cousin.
- (d) Human Testimony. History. Monuments. Tradition.
- (e) Skepticism. Traditionalism. Rationalism. Necessity of Revelation.

ONTOLOGY : (a) Utility of Ontology and its Relation to Other Sciences.

- (b) Being. Essence. Existence.
- (c) The Transcendentals : Unity, Truth, Goodness, Beauty.
- (d) The Categories of Aristotle. Substance and Accident. Person. Nature. Time and Space.
- (e) Causes and Their Different Kinds.

COSMOLOGY : (a) Different Systems on the Constitution of Bodies. Scholastic System of Matter and Form. The Atomic, Dynamic, and Chemical Systems.

- (b) The Vegetable and the Animal Kingdoms.
- (c) Origin, Perfection of the Universe. Natural Laws, Miracles.

HISTORY OF PHILOSOPHY :

ANCIENT PHILOSOPHY—(a) Schools and Systems. The School of Miletus. The Eleatic and the Pythagorean Schools.

- (b) Socrates, Plato, Aristotle, Epicurus.
- (c) The Stoics. Sceptics. Eclectics.

PHILOSOPHY OF THE MIDDLE AGES :

- (a) Its Relation to Ancient Philosophy.
- (b) Aselm, Abelard, Bernard, Thomas of Aquin. Duns Scotus. Occam. Bacon.
- (c) Nominalism. Realism. Conceptualism.

LATIN—Cicero, De Oratore, De Amicitia, De Senectute.
Horace—Epistles Selected.

ENGLISH—Writing of four essays.

Outline of 18th century English Literature.

Selections—Dryden to Burns in Manly's English Poetry.

Selections—Bunyan to Junius in Manly's English Prose.

Coleridge—Ancient Mariner, Kubla Kahn, France, Frost at Midnight, Dejection, Youth and Age.

Scott—Marmion, Hunting Song, Soldier, rest, thy warfare is Over, and other poems.

Byron—Vision of Judgment.

Shelley—Adonais, Ode to the West Wind, To a Skylark and others.

Keats—Eve of St. Agnes, Eve of St. Mark.

Browning—Cavalier Tunes, How they Brought the Good News, Saul, Love among the Ruins, and others.

M. Arnold—Sohrab and Rustom, Philomelia, Scholar Gypsy, Thyrsis, Dover Beach.

FRENCH—Writing of Essays in French ; conversation. Practice in Reading and Sight Translation.

N. B.—The last two years of French are optional except for Canadian students, who purpose entering the Seminary.

II

Academic or High School Course.

For admission to the Academic or High School Course applicants from Canada must have passed the Entrance examination set by the Department of Education, and applicants from United States must have completed the VIII grade.

The subjects of the course are : Christian Doctrine, Latin, Greek, French or German, English, History, Geography, Mathematics and Science.

Students who wish to qualify for Entrance to Normal examination are required to take Art and Bookkeeping.

FIRST YEAR.

CHRISTIAN DOCTRINE—The Commandments in general ; the Ten Commandments of God ; the Six Commandments of the Church.

LATIN—Declensions of Nouns, Adjectives and Pronouns ; Comparison of Adjectives and Adverbs, Conjugation of regular verbs in the indicative, active and passive. Latin Compositions and Reading Lessons ; Simple Rules of Syntax.
Greek and German are begun in the second year.

FRENCH—Grammar : Correct pronunciation ; practice in reading ; Exercises in French Composition ; Translation of easy French into English.

ENGLISH—(a) Reading—Intelligent and intelligible natural reading ; exercises in breathing, articulation and vocalization.
(b) Grammar—The principles of Etymology and Syntax, including the logical structure of the sentence and the inflection and classification of words.
(c) Composition—Oral and written composition, narrative and descriptive, letter-writing, reproduction. The principles of composition learned from the criticism of the compositions.
(d) Literature—Intelligent comprehension of suitable authors in prose and poetry ; oral reading ; memorization and recitation of selected passages in prose and poetry. Private reading of at least four classics in English literature, selected from a list prepared by the director of studies. The books will be found in the Students' Library.

HISTORY—The leading events in the history of Canada ; outlines of British History.

GEOGRAPHY—Physical ; the building of the earth, its land surface, mountains, volcanos, earthquakes, rivers, lakes. The Ocean ; the Atmosphere.

Commercial—Great Britain, Canada and United States ; their divisions, climates, inhabitants, products, manufactures, exports, imports, trade routes, centres of manufacture.

ARITHMETIC AND MENSURATION—Review of principles ; measures, multiples, the metric system fractions (vulgar and decimal) ; contracted methods of computation ; square root, percentage, interest and discount. Mensuration :—The rectangle, the triangle, the parallelogram, the circle.

ALGEBRA—Elementary work ; factoring ; H. C. F. L. C. M. fractions, simple equations.

GEOMETRY—Definitions, fundamental conceptions and principles. Practice with geometrical instruments ; some geometrical truths reached by induction.

SCIENCE I—Plant and Animal life.

(a) September to November.

1. Botany—Structure and functions of flower, leaf, stem, root, etc. ; organs of flower, functions, fertilization, fruits, seeds ; food of plants.

2. Zoology—Insects and flowers, life history of insects having complete metamorphoses ; recognition of common birds, relations of their habits and structure.

(b) April to June.

1. Botany—Relation of plants to light, moisture and heat ; uses of roots and leaves, Germination of seeds ; development of parts.

2. Zoology—Life history of Frog ; continuation of study of birds. Economical insects. Familiarity with the more common fishes, frogs, lizards and snakes.

II.—Physics and Chemistry—November to April.

(a) Physics—Forms of matter ; states and conditions. The Metric System—standards of length, area, volume, weight, density. Problems. Properties of solids, liquids and gases. Some common applications. Solution, diffusion ; specific gravity—common methods of finding. Fluid pressure, barometer, Boyle's Law.

- (b) Chemistry—Physical and Chemical changes ; classification of substances ; mixtures, solutions, elements. Water—composition, distribution, forms, uses. Air—composition, impurities, diffusion of gases ; combustion.

ART*—Drawing from models in light and shade and color. Memory drawing. Freehand perspective.

BOOK-KEEPING*—Single and double entry ; use of the various books ; business papers.

SECOND YEAR.

CHRISTIAN DOCTRINE—The Means of Grace : The Sacraments in general ; the Sacraments in particular ; the sacrifice of the Mass ; prayer.

LATIN—Grammar : work of first year reviewed ; complete conjugation of regular verbs ; irregular verbs and nouns ; syntax. Translations : easy stories, selections from Nepos, Caesar, Bellum Gallicum Book I. Composition : exercises involving the various Latin constructions ; exercises based on authors read.

GREEK—Grammar : Declension of Nouns, Adjectives and Pronouns. Conjugations of Verbs in $\bar{\omega}$ including contract Verbs. Simple rules of syntax. Translation—Reading lessons, easy selections. Composition : exercises in composition involving the use of grammatical forms learned.

FRENCH—Grammar—Work of the first year reviewed ; study of etymology and syntax continued. Exercises in reading and pronunciation. Translation of easy French into English. Exercises in French composition.

GERMAN—Grammar : etymology of Nouns, Adjectives, Pronouns and Regular Verbs. Exercises in reading and pronunciation. Translation of German into English. Exercises in German composition.

ENGLISH—(a) Grammar—Etymology and Syntax reviewed ; analysis ; prefixes ; suffixes ; root-words. Historical outline of the development of the English language.

(b) Composition—Course of the first year continued. Exposition. The Essay. The principles of composition.

*Art and Book-keeping are required only of students preparing for teachers' certificates.

- (c) Literature—Intelligent and appreciative study of selections in prose and poetry. Class reading and criticism of suitable authors. Memorization of selections in poetry and prose. Private reading of standard works as in first year.

HISTORY—England, Canada and United States from 1763 and 1776 to the present time, outline of the history of Greece to the fall of Corinth; and of the history of Rome to the death of Augustus.

ARITHMETIC AND MENSURATION—Review of work of first year. Commission, insurance, stocks, exchange. The Parallelopiped; the Prism; the Cylinder.

ALGEBRA—Review of Factors and Fractions, Simple Equations of one, two and three unknowns. Square root; Cubic root.

GEOMETRY—Review of work of first year. Books I and II of Baker's "Geometry for Schools."

SCIENCE—I—Plant and Animal Life.

(a) September to November.

- 1 Botany—Plant societies. Special study of typical weeds, ferns, mushrooms. Parasitism and Saprophytism. Plant enemies. Comparative study of fruits.
- 2 Zoology—Mammals—their characteristics. Native Mammals. Modifications for aerial life; arboreal, subterranean and aquatic life. Herbivorous and carnivorous mammals. Adaptation of fish, frog, bird and mammal to environment.

(b) April to June.

- 1 Botany—Trees—orchard and forest; conifers, fertilization. Plant physiology. Fungi continued; economic uses of plants.
- 2 Zoology—Food supply of birds and insects, beneficial and injurious. Life history of some common insects; economic uses of animal products.

II—PHYSICS—November to April.

- 1 Energy transformations; heat and temperature; thermometers, Fahrenheit and Centigrade; expansion by heat; Charles' Law; change of state; calorimeter; specific heat; heating and ventilation of houses.

III—CHEMISTRY—November to April.

Oxygen—preparation and properties; oxidation, combustion and reduction.

Hydrogen—preparation and properties. Water—composition, impurities, tests, uses. Ammonia, Carbon; Carbon Dioxid; Limestone. Common Acids, bases and salts.

ART*—Continuation and extension of work of first year.

BOOK-KEEPING*—Continuation of work of first year.

THIRD AND FOURTH YEARS.

CHRISTIAN DOCTRINE—Faith—Its object, necessity, qualities ; articles of faith ; the Apostles' Creed.

LATIN—Grammar : Etymology and Syntax, reviewed and completed.
Translation : Caesar, *Bellum Gallicum*, Book IV., Chapters 20-28, and Book V., Chapters 1-23 ; Vergil *Aeneid*, Book I. Sight translation. Supplementary reading.
Composition : Continuous prose, based on Caesar, illustrating Latin syntax.

GREEK—Grammar : Review of work of second year. Verbs in mi-Syntax.
Translation : Xenophon ; Easy Selections from Philpotts and Jerram's Xenophon, Chapters 3, 4 and 5. Homer, *Iliad* I. Sight reading.
Composition : Translations of phrases and sentences into Greek, to illustrate Greek accidence and syntax. Continuous prose, based on Xenophon.

FRENCH—Grammar : Etymology and Syntax, continued.

Translation : Lamennais, *Paroles d'un croyant*, Chap. VII. and XVII. ; Perrault, *Le Maître Chat ou le Chat Botté* ; Dumas, *Un Nez Gelé*, and *la Pipe de Jean Bart* ; Alphonse Daudet, *La dernière Classe* and *la Chèvre de M. Seguin* ; Legouvé *La Patte de dindon* ; Ponvillon, *IIortibus*, *Loti*, *Chagrin d'un vieux forçat* ; Molière, *l'Avare*, Acte III, Sc. 5 ; Rouget de L'Isle, *la Marseillaise* ; Arnault, *la Feuille* ; Chateaubriand, *l'Exilé* ; Victor Hugo, *Extase* ; Lamartine, *l'Automne* ; De Musset, *Tristesse* ; Sully Prudhomme, *la Vase brisé*, *La Fontaine*, *Le Chêne et le Roseau* ; Labiche, *La Grammaire*.

Sight Reading : Exercises in reading.

Composition : Translation of easy continuous prose into French.

GERMAN—Grammar : Etymology and Syntax continued.

Translation : Selections contained in the High School German Reader ; Leander, *Träumereien*. Sight translation. Exercises in reading.

Composition : Translation of easy passages of English into German.

*Art and Book-keeping are taken only by students preparing for students' certificates.

ENGLISH—Grammar and Rhetoric : Review of work of two preceding years. More extended and thorough study of the matter. The principles of Rhetoric.

Composition : Work of the preceding years continued ; the study of models in narration, description, letter-writing and exposition.

Literature : Tennyson, *The Poet*, *The Lady of Shalott*, *Oenone*, *The Epic and Morte d'Arthur*, *St. Agnes' Eve*, *The Voyage*, "Break, break, break," *In the Valley of the Cauteretz*; Browning, *My Last Duchess*, "How they brought the good news from Ghent to Aix," *Love among the ruins*, *Home Thoughts from Abroad*, *Up at a Villa*, *Andrea del Sarto*, *The Guardian Angel*, *Prospice*, *An Epistle of Karshish*, *Cavalier Tunes* ; Shakespeare, *Macbeth*.

Intelligent and appreciative understanding of above ; memorization of finer passages. The reading of selected books of standard authors in the Students' library.

HISTORY—Great Britain and Canada from 1763 to present time ; outlines of preceding periods of English history. History of Greece to the fall of Corinth and of Rome to the death of Augustus with a brief outline of the art, literature, philosophy and social life of the Greeks and Romans.

GEOGRAPHY—Geography relating to the history prescribed.

ARITHMETIC—Review and more extended study of the work of the preceding years.

ALGEBRA—Course of preceding year reviewed and continued ; indices, surds, quadratics of one and two unknown quantities ; the relation between their roots and co-efficients.

GEOMETRY—Review of the elements and Books I. and II. Books III. IV. V. of Baker's "Geometry of Schools."

SCIENCE—Physics : Review of metric units ; review of heat and sound ; use of vernier, micrometer and balance ; laws and properties of gases. Nature and propagation of light ; reflection and refraction ; the prism and spectrum, color. Magnetism and Electricity ; lodestone, magnetic field, terrestrial magnetism ; the compass and dipping needle. Simple cells ; electro-motive force ; currents, effects of currents, magnetic, chemical ; heating and lighting ; practical applications.

CHEMISTRY—Preparation and properties of nitrogen, carbon, sulphur, chlorine and their compounds of commercial importance. Distinction between mixture and compound, elements and compounds. Nomenclature ; laws of chemical combustion ; reacting and formulae weights ; symbols, equations, problems.

A laboratory course in all years is conducted in the different branches of Science. Students make their own experiments under the observation of the professor.

Students, preparing for teachers' certificate take a special course in English Grammar and Arithmetic in the Third and Fourth years of the High School course.

III.

Commercial Course.

For admission to the Commercial Course the student must have at least High School Entrance or ninth grade standing. We say, at least, 9th grade standing, for it is very desirable that a student of business should first take two years or more in the High School Course. The fact is coming home more and more every day to business men, that the successful man has to know many things besides the mere routine of business transactions. He must be able to grasp the problems involved in capital and labor, in supply and demand; he must have a comprehensive idea of trade relations, of commerce, both domestic and foreign, and be able to express his views forcibly; so that a commercial education is a very complete education, and needs a training not much inferior to that required for a study of the liberal professions. In fact, now-a-days, commerce is a profession. It requires more than a knowledge of book-keeping, type-writing, or stenography. These are but a small, though an essential part of a commercial education, since the business man can always engage others to do his clerical work and yet requires the knowledge to correct and audit. Therefore the College advises parents and students to aim at a solid practical literary education in the first place, whenever possible.

The system in the Commercial Course is individual teaching and hence the student may advance as rapidly as he chooses. The average student should complete the business course in one year. The final examination is set by one of the leading Business Colleges of Toronto, and diplomas are awarded to successful candidates in both the Business Department and the Shorthand and Typewriting Department.

SCHEDULE.

THE BUSINESS DEPARTMENT.

CATECHISM—Dehabe's Full Course of Catholic Doctrine.

SPELLING—A very complete course in this important branch.

PRACTICAL ENGLISH—Review exercises in Grammar with special attention to the correction of false syntax.

PENMANSHIP—The Palmer Method of Muscular Business Writing.

RAPID CALCULATION—A Systematic Course in the handling of figures ; naturally promoting accuracy and speed in billing and the daily computations met with in ordinary business.

ARITHMETIC—Percentage, Simple and Compound Interest, Discount, Commission and Brokerage, Stocks and Bonds, Insurance and Taxes, Duties, Collection and Exchange, Foreign Exchange, Partial Payments, Equation of Accounts, Partnership, Bankruptcy, Storage, Cash and Daily Balances, etc.

BOOK-KEEPING—A Practical Course in Single and Double Entry Book-keeping, illustrating fully all the latest methods followed in the various mercantile branches. Journalizing—the important groundwork of all business records—is thoroughly taught from the beginning, and thereafter the student is enabled to easily follow the various books so necessary to the up-to-date methods of recording business transactions.

BOOK-KEEPING AND BUSINESS PRACTICE—"Learning by Doing." This is a practical course in the handling of the books and accounts of Wholesale and Retail Business, Shipments and Consignments, Single Ownership, Partnership, Joint Stock Companies and Joint Accounts. An interesting and useful practice in the handling of money, notes, drafts, checks, receipts, orders, mortgages, leases, deeds, Articles of Co-Partnership, Power of Attorney, etc.

A special set in Farm Book-keeping.

Also, Loose-Leaf Ledger, Card Index and Ledgerette Systems.

COMMERCIAL LAW—Contracts, Negotiable Instruments, Personal and Real Estate Sales, Guaranty and Suretyship, Agency Partnerships and Corporations, Banks and Banking Laws, Insurance, Landlord and Tenant, Interest and Usury, Mortgages, Wills, Patents, Copy-right, etc.

BUSINESS LETTER-WRITING—All correspondence connected with the Mercantile Office. Thoroughly illustrating the use of various appliances found in the up to date office ; Follow-up System ; Vertical-Filling ; Letter-Copying ; Billing ; Circulars and Advertising, etc.

SHORTHAND AND TYPEWRITING DEPARTMENT.

CATECHISM—Deharbe's Full Course of Catholic Doctrine.

SPELLING—A very complete course in this important branch.

PRACTICAL ENGLISH—Review exercises in Grammar with special attention to the correction of false syntax.

PENMANSHIP—The Palmer Method of Muscular Movement Business Writing.

RAPID CALCULATION—A systematic course in the handling of figures.

BUSINESS FORMS—Theoretical and practical knowledge of various business papers : notes, drafts, checks, mortgages, leases, deeds, receipts, orders, etc.

BUSINESS LETTER-WRITING—All correspondence connected with the Mercantile Office. Thoroughly illustrating the use of appliances found in the up-to-date office : Follow-up Systems ; Vertical Filling ; Letter Copying ; Billing ; Circulars and Prospectuses, and Advertising.

SHORTHAND—THE ISAAC PITMAN SHORT COURSE—A thorough mastery of simple theory, and sentence-writing from the beginning. Ample practice and daily dictation enable the student to acquire a high degree of speed in verbatim reporting.

TYPE-WRITING—In this department the UNDERWOOD typewriter is used. The System is the well-known Smith Touch-Type-writing. By this system the student acquires the highest degree of speed and the minutest accuracy. The course includes the making of transcripts from short-hand notes ; writing from dictation ; letter-writing ; carbon copying ; billing and tabulating ; abstract-writing ; and all business forms.

IV

Preparatory School.

The desire to meet a popular demand has led to the establishment of a preparatory course in the Collège; it is known as the Preparatory School, and is intended for boys usually under the age of fourteen years. Instruction in the elementary branches of an English education is here imparted, and scrupulous attention paid to the up-bringing of the little fellows. They have their own play-ground, study-hall and dormitories. During the hours of recreation, as well as in the school rooms, they are always under supervision. The discipline is mild and recourse is seldom had to punishment, those in charge endeavoring to govern by kindness, and by appealing to the little boys' sense of honor. Neatness, diligence and piety are particularly inculcated, and especial attention is bestowed toward preparing for first Holy Communion. By way of encouragement, the best behaved are admitted to membership in a religious society, called the Guardian Angel of the Sanctuary; whilst the names of all whose conduct and application are satisfactory, appear in the college catalogue under the heading of **ROLL OF HONOR**.

For admission to the Preparatory School pupils must have passed into Junior Third in the Ontario School system, or have attained fifth grade standing in the American schools.

GRADE V. OR JUNIOR III.

CATECHISM—Butler's Long Catechism.

BIBLE HISTORY—From the creation of the world to the birth of Moses.

READING—Intelligent and intelligible, natural reading. Use of the dictionary ; Exercises in breathing and articulation. Memorizing. Use of library.

SPELLING AND DICTATION—Oral and written work in spelling. Words selected from reading lessons and other subjects taught in this grade. Exercises in dictation.

COMPOSITION AND GRAMMAR—Oral and written composition. Reproduction of stories. Expression of thought on given topics. Classification of sentences into paragraphs. Enlargement of vocabulary. Accurate use of words. Letter-writing. Use of capitals and marks of punctuation. Different forms of sentence, assertive ; interrogative, imperative and exclamatory ; Subject and predicate ; noun and verb.

HISTORY—The original inhabitants of Canada and United States. The discoverers, warriors, statesmen, inventors, writers. Important conditions and events in the history of the two countries.

GEOGRAPHY—Physical and Commercial Geography of America, North and South ; Canada and United States ; Ontario, Michigan and Ohio. Map-drawing. Historical and current geography.

Assumption College Review.

At the annual dinner of the Alumni Association, held Nov. 6, 1907, Mr. T. T. Kelly, '08, made a plea for a college paper. His remarks were greeted with the approval of both the old students and the present student body. The staff also welcomed the suggestion, and steps were immediately taken to publish a monthly paper, the first number appearing in February, 1908. The work was a success from the beginning, and this attractive literary production is now regularly awaited with pleasant anticipation by a large number of subscribers.

The aim of the *Assumption College Review* is to cultivate a taste for literary composition and to inspire among the students a love of the noblest and best productions in English literature. It is intended also to foster fraternity between the alumni, the students and their Alma Mater.

SHORTHAND.

Young Men entering our Shorthand and Typewriting Departments will find therein every facility for acquiring the best in these useful arts. The System of Shorthand taught is the Isaac Pitman, highly recommended as the best of all systems for the absolute legibility and scientific adjustment of all its parts, as well as for its superiority at the highest speeds.

The above cut illustrates the Text-Book in use. Forty Lessons complete the Course—lessons which are easily mastered. This Text is in general use throughout the High Schools and leading business Colleges of Canada and the United States, and has been officially adopted for the High Schools of New York, Brooklyn and other large cities.

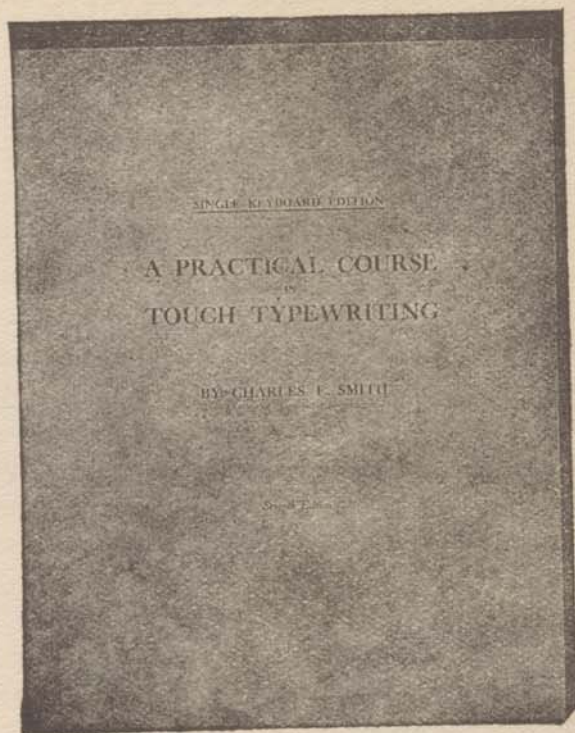

Special features of this work are :—

- Position Writing from the Beginning.
- Words and Sentences introduced in the First Lesson.
- Business Letters in the 9th and subsequent Lessons.
- Phraseography taught from the 5th Lesson.
- Reporting Style from the Beginning.

Our Stenography Department affords a Complete Course in Office Routine. It gives to the Shorthand pupil practice in envelope addressing, letter-writing, invoicing, rendering accounts, letter-copying, shipping by freight and express, manifolding, mimeographing, filing correspondence and all other lines of Office Work. It familiarizes the student with business expressions and terms, business papers and office stationery. It gives to the young stenographer explicit instruction in regard to the duties which will be required of him upon accepting a position. It provides for the Shorthand student while at school exactly the kind of work which he will meet with in a business office.

See Page 47 of this Catalogue.

TYPEWRITING.

A Scientific Method of Mastering the Keyboard of the Typewriter by the Sense of Touch.

The design of this work is to teach typewriting in such a way that the student will have an absolute command of every key on the keyboard, and be able to strike any key more readily without looking than would be the case with the aid of sight—a very valuable asset for the business amanuensis and typist. The course contains every specimen of actual Business Letters, Legal Forms, Specifications, Instructions for the use of the Tabulator, etc., all printed in actual typewriter type.

With the aid of this book we find our students can produce the best results in the shortest time.

See Page 47 of this Catalogue.

Our Typewriting Department is complete in every respect. Therein the student will find all that will enable him to become an efficient Typist. Every facility is afforded him to make the acquaintance of the best that inventive genius has achieved in the evolution of the up-to-date Typewriter.

This department is equipped throughout with the latest models of the ever-popular Underwood Typewriter.

Our Business Department throughout is built up along the lines of the most up-to-date systems of Business Training. All subjects are treated from a practical standpoint, and young men entering the various courses are assured the greatest amount of progress with the least amount of resistance. The Text-books in use are those recognized as best by Business Colleges, Academies and High Schools of Canada and the United States. From the Office Practices in use our students can easily graduate into any office in the Business World. The methods employed are the "Learn by Doing" methods so much in vogue to-day.
